Claims

- [c1] An anti-theft device that protects from tampering a fuel dispenser of the type containing a liquid control meter and a pulser, comprising:

 a substantially impenetrable protective cover that substantially surrounds and bars access to said pulser; said protective cover being fixedly secured to a preexisting frame of said dispenser.
- [c2] The anti-theft device of claim 1, further comprising: said protective cover, when in an installed configuration, having a first side wall adapted to be fixedly secured to a liquid control meter, a front wall, an angled wall that interconnects said first side wall and said front wall, a second side wall, an end wall, and a tab.
- [03] The anti-theft device of claim 2, further comprising: a rectangular slot formed in open communication with an edge of said first side wall, substantially centrally thereof, to accommodate said liquid control meter.
- [c4] The anti-theft device of claim 2, further comprising: said first side wall having an extent equal to about twice the extent of said second side wall.

- [c5] The anti-theft device of claim 2, further comprising: said end wall having an extent substantially equal to the extent of said second side wall.
- [c6] The anti-theft device of claim 2, further comprising: said first side wall being disposed substantially parallel to said second side wall.
- [c7] The anti-theft device of claim 2, further comprising: said angled wall being positioned at a substantially forty five degree (45°) angle relative to said first side wall and said front wall.
- [08] The anti-theft device of claim 2, further comprising: said tab being fixedly secured to said second side wall at an end thereof opposite from said end wall.
- [09] The anti-theft device of claim 2, said tab being positioned in perpendicular relation to said second side wall.
- [c10] The anti-theft device of claim 9, further comprising: a lowermost edge of said tab being substantially coinci-dent with a lowermost edge of said second side wall.
- [c11] The anti-theft device of claim 2, further comprising: said tab being fixedly secured to a support plate that forms a part of said frame of said dispenser; said support plate supporting said liquid control meter;

and said liquid control meter being fixedly secured to said support plate.

[c12] The anti-theft device of claim 11, further comprising: said first side wall of said device being fixedly secured to said liquid control meter.
